8.	First-Year Tuition and Annual Related Educational Expenses in Dental Schools in the United States and Canada, 1986-87	10
9.	Dental Schools which offer a Combined DDS and Other Degree, 1986-87	11

INTRODUCTION

The supplements to the Annual Report on Dental Education are intended to provide the Commission on Dental Accreditation, dental educators and practitioners, state and federal agencies, and other interested groups and individuals with information on various aspects of dental education. The purpose of the present supplement, **Dental School Admission Information**, is to provide information regarding admissions and the admissions policies of the 69 dental educational institutions* located in the United States, Puerto Rico, and Canada. Specifically, the information being reported in this supplement includes the number of applications received by dental schools, the academic qualifications of first-year students, the criteria employed in the admissions process, advanced placement for transfer students, first-year tuitions and annual related educational expenses, and combined degree programs in dental schools. The information in this report was obtained from the 1986-87 Survey of Predoctoral Dental Educational Institutions, American Dental Association.

Table 1 reports the total number of applications filed at each individual dental school for admission into the 1986-87 freshman class. The total number of applications filed at United States dental schools was 29,060. This is a decrease of 9.7% from the number reported last year (32,195). There were a total of 20,687 (71%) applications filed by males and 8,373 (29%) filed by females. The first-year enrollment also is reported in Table 1. There were 3,167 (70%) males and 1,387 (30%) females accepted in the 1986 freshman class. Therefore, the application/acceptance ratios for males and females were comparable.

Please note that each applicant applies to approximately five schools. This makes the number of applications received by the schools (as listed in Table 1) much greater than the number of individuals applying to dental schools. For the year 1986, there were 29,060 applications received by the schools, there applications were submitted by 5,724 students. The actual ratio between individual applicants and accepted first-year students is 1:3 to 1.

Table 2 reports the average Dental Admissions Test (DAT) results and grade point averages (GPA) for the 1986-87 freshman class. The mean DAT academic average was 4.35, with 10 schools reporting an average score of 5 or better. The mean DAT perceptual ability test score was 4.50 with 11 schools reporting an average score of 5 or better. Both the 1986 overall mean academic average and mean PAT scores decreased slightly fom last year's mean values. The mean academic average for 1985, first-year students was 4.41, and the mean PAT scores was 4.55. The mean predental science GPA for the 1986 entering freshman class was 2.86 while the mean predental non-science GPA was 3.18. The 1986 mean predental non-science GPA decrease slightly from last year's mean value. The mean predental science GPA for the 1985 entering freshmen class was 2.86, while the mean predental non-science GPA was 3.19. Table 2 also includes the overall predental GPA for the 1986-87 freshman class.

Table 3 reports the DAT scores used in the admissions process for the 68 United States and Canadian dental schools for the 1986-87 academic year. An examination of the tabled entries indicates that all 58 dental schools in the United States employ the DAT academic average perceptual ability test results in the admissions process.

Table 4 reports the predental grades used as admissions criteria by the same set of institutions. As shown, all 58 dental schools in the United States employ the predental science GPA in the admissions process. This table also indicates whether interviews, recommendations, and manual dexterity tests are used. Finally, the number of requires years of predental education are reported. As shown for the 58 dental schools in the United States, 29 institutions require three years of predental education, 27 institutions require two years and two require four years.

Tables 5 and 6 show the relative rank of importance associated with the various criteria included in the admissions process for each of the 68 dental schools in the United States and Canada. The median values reported for the criteria indicate that DAT academic averages, DAT perceptual ability test scores, DAT science scores, as well as predental science and overall GPAs, are important criteria for most institutions. Admission interviews also are ranked as important at many institutions.

Table 7 shows possible advanced placements for transfer students. Columns 6 and 7 indicate whether the school grants credit for certain course only or for an entire term.

Table 8 reports the first-year tuition and related educational costs for the 1986-87 academic year. Columns 2 and 3 indicate the resident and non-resident tuitions, column 4 indicates that amount charged for general fees for the first year, columns 5 to 8 indicate other educational costs for all four years. The average first-year resident tuition for all institutions in the United States is $7,557.00 while that for public institutions is $3,685.00, private institutions is $14,600.00, and private-state related is $11,491.00.

Table 9 reports the dental schools which offer combined degree programs. An examination of the table indicates that 21 dental schools offer a combined DDS-PhD program, 20 schools offer a combined DDS-MS program, 5 schools offer a combined DDS-MPH program, 2 schools offer a combined DDS-MD program, and 12 schools offer a combined Predental-Dental program.

*Emory University is discontinuing its dental education program and is no longer accepting an entering class.
